

Hi, my name is Selsi Lizette Olivan Aviles, I am 18 years old and I live in zihuatanejo de Azueta, I have two siblings, one's 5 years old named Abelito and the other's 9 years old who is called fernanda, I have just finished the high school, and it wasn't easy. A year ago someone saw my enthusiasm for the school and decided to support me by getting to this foundation, which I thank with the heart, because they are difficult times of pandemic and more for those who want to study outside as is my case, a soul so good that I saw how I was trying to get good grades while also selling some things to help my mother with my studies. I want to study medicine, I passed the exam and I intend to study in Acapulco at the Medicine Faculty; and although I know that, it will be a lot of expenses and effort from my parents and that is why I have been doing my best in school. When I entered the Foundation I met don José, who has been very kindly supporting me with everything, I am very grateful for all the support.
