

Hello!

My name is Luis Alberto Gonzalez Bustos, I was born on August 30<sup>th</sup>, 2003 in Zihuatanejo, Guerrero. In a month I will be 18 years old, my hobbies are listening to music, painting, going to the beach, going for a walk, cooking, I also really like gardening. My mother's name is Idania Bustos Herrera, she works as a chambermaid in the hotel zone of the port and my father's name is Gilberto Gonzalez Ortiz who works as a maintenance worker in the hotel zone. I have an older brother who is called: Luis Manuel Gonzalez Bustos and a younger sister who is called Maria Arleth Garcia Bustos, I am the middle brother. I just finished my 12th school year, where I got a final average of 9.9, this was one of my proposed goals when entering high school, since in middle school I had done well more however I knew I could improve and I

achieved it, obviously I can not say that the merit is only mine, but I owe it to all those people who have supported me throughout this time, people like: my parents, brothers and of course the foundation of Niños Adelante that without them I could not have met my godmother who has always supported me. My story in Niños Adelante began 6 years ago when I finished elementary school, when I had just been assigned to a godfather, but the following year for reasons I do not know I was assigned to my current godmother Brooke O'Donnell, for which my gratitude is infinite since she has supported me unconditionally from the first day we had contact for this and for many more reasons I thank her deeply and sincerely to the Foundation Niños Adelante, because she is contributing greatly to fulfill my dreams.

My dreams or my plans for a future since childhood have been to finish a professional career, since in my family, very few people have achieved it and I would like to be one of those people. Also for the future, I would love to practice my profession in the best possible way. I would just like to master the English language because I know that this will open up great and new opportunities for me. I would like to explore different parts of the world, meet people with different cultures and traditions of which I can enrich my knowledge. Finally, my biggest dream is to be able to support people to fulfill their dreams in the same way that they have supported me and driven me to fulfill my own goals and dreams.

Little by little I have been working to fulfill these dreams, but the one that I have ultimately worked hardest is to finish my academic training, the first steps to fulfill this was to finish high school, the other was to find the best university.

After researching universities in which I could apply that were not far from Zihuatanejo, one of them was Engineering in Chilpancingo. The first time I attended was when I took out my file. On this occasion my dad could accompany me. I was really very excited that it was the beginnings of my dream, then I had to attend again for the admission exam. I have to admit that I was a little nervous but I was confident that I had prepared enough and had the support of my whole family, when they delivered the results I was very excited to see my name on the lists. This meant that my goal of entering the university had come true. I will study Civil Engineering at the Faculty of Engineering of the Autonomous University of the State of Guerrero (UAGro) located in Chilpancingo.

I know that I will strive every day to achieve this dream that I wanted for so long, I also know that I will not give up so simply, I know that I will achieve it.

Luis Alberto Gonzalez Bustos
